

# BERGaktiv guided hike at the avalanche path Blons

The biggest avalanche disaster in the valley occurred in 1954. Blons was severely affected by the avalanches.

## Description

In addition to many new houses with great architecture starting with the community center and the avalanche documentation center located inside, you will learn how the village has developed since the catastrophe in 1954. You hike on the Leusorgweg to Oberblons. An old Walser house is visited. Via Eschtobel you continue to the photovoltaic plant and via Valentschina back again. The information boards along the way remind of the avalanche catastrophe of that time.

**Dates:** 07/06, 05/07, 12/07, 02/08, 06/09/2024
